Learn about the **Health Supply Information Management Maturity tool (H-SIMM)**, the tool that can potentially save health systems billions of dollars!

KEYNOTE SPEAKER

Dr. Anne Snowdon

Executive Director of Clinical Research

HIMSS Analytics

Dr. Snowdon will present the design and development of the H-SIMM, Health Supply Information Management Maturity tool, and present current evidence of the value and impact of supply chain maturity initiatives globally to advance health system performance. Strategies that successfully advance supply chain infrastructure in health systems and evidence of impact and value of supply chain infrastructure in health systems will be presented in this session.

Expert speakers will share their thought leadership on topics such as sustainability & growth, patient experience, cyber security & AI and value based care.
